

What have we been up to?

- We have launched an **Ammonia Scheme!**
We have just completed our first successful pilot distribution with nearly 100 laboratories returning results and they look very good!!
- We attended the Laboratory Medicine National Audit Meeting where it was good to talk to colleagues about their recent work and develop new collaborative opportunities
- We work with all manufacturers. Last week Finlay spoke at the **QuidelOrtho** Clinical Laboratories User Group Meeting.

There will be a **BIG announcement** at our December webinar. We will also be joined by the Scheme Organisers for all centres where you will have the opportunity to ask any question! Please register **TODAY!**

Scheme Updates:

- The **UK NEQAS for Steroid Hormones** Distribution 523 looked at the impact of Fulvestrant and Exemestane on Oestradiol as well as how laboratories handle requests from patients on any cancer therapy. Please look at your report!
- We have revisited hypokalaemia and low-level haemolysis in the **UK NEQAS for Serum Indices** Scheme at Distribution 189. Unfortunately, not a lot has changed over the last year.
- If you are interested in Thyroglobulin, please take a look at the commentary at Distribution 199 of the **UK NEQAS for Thyroglobulin Scheme**.

EQA Nuggets:

Did you know you can access commentaries from under the Scheme Button?

There is a lot of useful information here, so please take a look!
